Summary

Backend Engineer specializing in AI-powered systems, with 4+ years of experience building scalable backend architectures across fintech and lending platforms, along with production-grade AI features. Led the Integrations module at SurveySparrow, owning architecture, delivery, and reliability across more than 30 external platforms. Strong hands-on experience integrating GPT-4o and Gemini models into customer-facing products, engineering AI-driven response enrichment systems and automation workflows.

Experience

SurveySparrow

Mar 2023 – Present

Chennai, India

Senior Product Developer - Integrations

July 2024 – Present

- Owned the end-to-end Integrations module, leading architecture, development, mentoring, and release management for more than 30 external platforms serving enterprise automation workflows
- Architected and delivered AI-powered survey response enrichment using GPT-4o and Gemini 2.0, transforming manual survey analysis into automated structured insights
- Built and scaled marketplace applications using AWS Lambda, DynamoDB, and CloudWatch in serverless environments
- Led cross-team collaboration to resolve critical customer escalations, ensuring production stability and long-term architectural improvements
- Integrated AI-assisted engineering workflows using Cursor and Codex, achieving 69.3% AI-generated code in Q2 2025 and accelerating feature delivery cycles

Product Developer

Mar 2023 – July 2024

- Designed and enhanced integrations connecting SurveySparrow with external platforms (Freshdesk, Zendesk, Zapier), improving product extensibility and automation capabilities
- Partnered with the Rapid Action Team to resolve L2 production issues, ensuring minimal downtime and high customer satisfaction
- Improved and scaled existing integrations, increasing sync performance and reliability for mission-critical customer workflows

Gain Credit

Jan 2022 – Feb 2023

Remote

Software Engineer I

Jun 2022 – Feb 2023

- Delivered end-to-end backend features for financial services products (Lending Stream and Drafty), supporting lending workflows, decisioning systems, and customer lifecycle operations
- Leveraged monitoring and decisioning tools (New Relic, Blaze Advisor, Adobe Campaign) to improve system reliability and campaign efficiency

SDE Intern

Jan 2022 – Jun 2022

- Built internal tools for Ops Engineers including permission controls and a custom configuration management console
- Automated customer communication workflows via Adobe Campaign for account suspension events

DHE4 Ventures

Nov 2021 – Dec 2021

Intern – Consultancy and Development

Remote

- Enhanced bioinformatics tools using BioPython and Tkinter, developing GUI components for nucleotide sequence analysis

Institute of Mathematical Sciences

Jan 2021 – Mar 2021

Research Internship

Remote

- Conducted research on cellular automata and cryptosystems, analyzing their applicability in biological cryptosystems

AI & LLM Engineering

- Designed and deployed production-grade AI-powered survey enrichment pipelines using GPT-4o and Gemini APIs
- Engineered prompt templates and structured output validation strategies for reliable AI-driven workflows
- Leveraged AI-assisted development (Cursor, Codex) to enhance engineering throughput and experimentation velocity

Selected Product Impact

- **Snowflake Integration** – Designed and launched native integration enabling automated survey data sync to Snowflake data warehouses.
[Product Documentation Link](#)
- **AI Response Enrichment (Smart Columns)** – Engineered AI-based enrichment system for automated summaries, keyword extraction, and structured insights.
[Feature Documentation Link](#)
- **SurveySparrow Apps & Integrations Platform** – Led and scaled the integrations marketplace module serving enterprise automation use cases.
[Marketplace Overview](#)

Education

Thiagarajar College of Engineering
Bachelor of Technology in Information Technology(GPA of 9.81)

August 2018 - May 2022
Tamil Nadu, India

Achievements

- **Calmer of Storms Award** – Recognized at SurveySparrow for resolving critical customer issues and ensuring timely delivery
- **Spirit in Value Nomination** – Acknowledged at Gain Credit for execution excellence and strong ownership.
- **Top Academic Distinction** – Graduated with highest honors in the Department of Information Technology.
- **Research Contributions** – Published 4 research papers and co-authored a book chapter with IGI Global.
- **Campus Ambassador** – Represented IIT Madras’ Shaastra (2019–2020), driving outreach and event engagement.

Technical Skills

Languages:	Node.js, JavaScript, Python, SQL (PostgreSQL, MySQL), MongoDB
Backend & Architecture:	REST APIs, Microservices, Event-driven systems, Hapi.js, Sequelize
Cloud & DevOps:	AWS Lambda, DynamoDB, S3, CloudWatch, Docker, ArgoCD, CI/CD
Monitoring & Observability:	New Relic, Elasticsearch, Logz.io
Integrations:	Salesforce, Snowflake, Zapier, Google Sheets, Excel Online, HubSpot, Teams, Slack, Freshdesk, Stripe, Power BI
